Mydochrome-28/42

Mydochrome-38/42 inks for Epson HDR series wide format inks are designed to give optimum quality work with these printers. The specially formulated encapsulated pigmented inks will provide the ultimate in photo quality printing, with smooth colour transitions and a wide colour gamut exactly matching the original ink set when using Epson media and Epson recommended drivers / profiles. For other media CDI Profiles are available.

Mydochrome-28/42 Features

- HDR series wide format inks are the ideal drop-in replacements and match the exacting colour gamut of the original OEM ink.
- Can be introduced without any interruption of workflow or requiring profiles to be modified or re-written when Epson media and Epson recommended profiles.
- Perform to Density and Delta E tolerances well within the acceptable industry levels and are virtually impossible to identify from the OEM inks, and have been preferred in some instances
- Match the same exacting quality and specifications of the OEM ink
- Be fed directly on top of the original ink without adjustment
- Be introduced as required e.g. one cartridge / one ink at a time
- High quality USA manufactured inks
- Not require new profiles or other adjustments to maintain the correct colour balance
- Uses ***"Self Disperse Technology" (SDT)*** to prevent head clogging/Nozzle block

Warranty

Mydochrome-38/42 inks are warranted to be free from defects in materials and workmanship until their expiry date.

For Champion Digital Inks full warranty terms and conditions, please contact your CDI Sales person or email our Service Plus Department.
