

RA-4 Print Chemicals:LORR System

Champion Photochemistry's Primaprint SP-LORR Developer/Replenisher is a Single Part Developer, high stability developer designed to cope with all processing environments and papers, while the single part Bleach-Fix is an ideal companion giving excellent stability and clean working

P1 Primaprint SP-LORR Developer / Replenisher

- Easy to mix single part developer, ideally suited for manual or Rockwell or equivalent mixers.
- Replenishment rate 80mls/m² @ 38°C.
- Special chelates for hard water areas, No hard-to-clean deposits in Developer / Replenisher tanks.
- Developer Creep (oxidized developer agent on crossover rollers/racks).
 1. Clean formulation significantly reduces 3 types of developer dirt:
 2. Tar-like suspended oxidized compounds in the developer solution that stick to rollers and racks.
 3. Cement-like calcified salts, caused by local hard water and paper hardening agent, which fall to the bottom of the tank.
- Easy drop-in replacement on top of existing chemistry.
- FRESH AIR INCLUDED - no fishy/amine smell in most instances.
- Extended shelf life -minimum 1 year from the date of manufacture in unopened container.

P2 Naturecare SNR Bleach Fix & Replenisher

- Single part (SP) homogeneous, clear bleach-fix which is easy to use - just mix with water.
- No parts to mix together, reduces risk of mixing errors and mixing time with less packaging waste.
- High antioxidant concentration, gives excellent longevity in the working strength Developer and Replenisher tank.
- Reduced effluent to drain compared to running at 54mls sqm.
- Single Part formulation is considered non-hazardous for shipping purposes.

P3 Mydoprint Rinse

- Single Part rinse works well with most RA-4 chemistry.

PROCESS SPECIFICATION

*recommended starting point

Step	Processing Stage	Processing time (Sec)	Temperature	Replenishment Rate*
P1	Primaprint SP-LORR Developer & Replenisher	45	38.0±0.3°C	80mls/m ²
P2	Naturecare SNR Bleach Fix & Replenisher	45	35.0±1.0°C	54mls/m ²
P3	Mydoprint Rinse	220	35.0±3.0°C	250-350mls/m ²

For non-standard process applications, please consult Technical Datasheet R-52 or contact Champion Service Plus Department via our website for assistance.

RA-4 Print Chemicals:LORR System

CHEMISTRY SPECIFICATIONS

	P1 Primaprint SP-LORR Developer & Replenisher		P2 NatureCare SNR Bleach-Fix & Replenisher	
	Seasoned Tank	Replenisher Tank	Seasoned Tank	Replenisher Tank
PH	9.90 - 10.20	11.9 - 12.1	7.3 ± 0.10	5.88 ± 0.10
SG	1.032 ± 0.01	1.030 ± 0.010	1.097 ± 0.010	1.104 ± 0.010

Preparation:

Primaprint SPLORR Developer / Replenisher

Replenisher Solution	Working Tank Solution Preparation
$8.95L + 1x = 10L$	$880ml + 80ml + 40ml = 1L$

NatureCare SNR Bleach-Fix / Replenisher

Replenisher Solution	Working Tank Solution Preparation
$6L + 1x = 10L$	$0.723L + 277mls = 1L$

Mydoprint Rinse / Replenisher

Replenisher Solutions	Working Tank Solution Preparation
$9.95L + 50ml = 10L$	For P3, Mydoprint Rinse, preparation of the tank solution is same as the Replenisher.

RA-4 Print Chemicals:LORR System

STORAGE OF CHEMICALS:

- Concentrates –**

Processing concentrates have a storage life of upto 24 months, when held in unopened containers under steady temperature conditions 13°C- 25°C(56°F-77°F).

Higher temperatures may result in chemical reactions and cause deterioration of the concentrate. Temperatures lower than 5°C (41.5°F) should be avoided as some crystallization may occur in concentrates.

- Working Solutions and Replenisher –**

Machine tank solutions should not be allowed to stand unused for more than one week or the activity will be reduced by aerial oxidation.

It is recommended that no more than one week's supply of the replenisher solutions should be made up at a time.

Replenisher solutions should be kept covered with lids to reduce evaporation, oxidation and contamination.

- Safe Use of Processing Chemicals-**

All chemicals should be kept out of reach of children. Refer to labels on the box and to the Material Safety Data Sheet for precautionary information. Protective clothing, including gloves and face / eyeprotection should always be worn when handling chemicals.

Contact our Service Plus Department or your local representatives to determine which combination of chemicals is best suited for your processing requirement.

SUPPLIES

P1	Primaprint SP-LORR Developer & Replenisher	6x10L	140150
P2	NatureCare SNR Bleach-Fix & Replenisher	4x10L	140561
P3	Mydoprint Rinse	2x200L	141006
P1-S	RA4 Print Developer Starter	Variable	140411

WARRANTY: Seller, Champion Photochemistry, expressly disclaims any and all warranties, express or implied, including any warranties of merchantability or fitness. Seller's sole obligation for defect is to replace the defective product. In no event shall seller have any liability for incidental or consequential damages.
